The card of invitation to the nineteenth annual session of the Knights of Pythias at Topeka, May 20, is the most gorgeous piece of triangular and diamond combination work that has opened, the eves of artists in a coon's age. The incidental boom which it attempts to give the quiet little temperance burg of Topeka is entirely pardonable.

SILK CULTURE.

Miss M. J. Davidson, of Junction City, one of the best informed and conse quently one of the most successful seri culturists in the state, writes to the Topeka Capital on that subject, and from her letter we make the subjoined extract, which will be read with interest, especcially by those who have been engaged in the industry, as well as such as may intend taking hold of it. But here is the extract from Miss Davidson's letter:

"Silk culture is no longer an experi-ment in the United States. It has been PROSPERITY—HOW TO OBTAIN IT."

The above is the rate of a little folder

as a duty is placed on the raw silk imor level pumphlet of thirty-six pages is, and by the executive committee of the

A duty placed on silk of one dollar per shine the old defenders of the union sas. A great number of these pamphlets from and not materially increase the price to the stirring music of a half dozen of thousands, we believe and these offi-brass bunds.

of thousands, we believe and these offi-corrs propose, they say, to send them to efficient million dollars to the in-the voters of Kansas, at least to send occupation for the wives and daughters The most prominent man in town to-flay is George Kennan, the great Siberian explorer and lecturer, says the K. C. the voters of Kansas, at least to send them as long as the funds which they day to the farmer, especially of the western states so alumidantly supplied explorer and lecturer, says the K. C. Star. This is the first intimation we various clubs, holds out. The pamphlet question that the osage orange leaves, opens by a demand for resubmission. The hodge fence of the treeless prairies, it contains extracts from speeches of will produce the best quality of silk. Eight years ago we made the experiment with a small broad of worms, with lialy is going right to the front, that it does not straight the property of the intention of making a men, principally Republicans, as also expanded the intention of making a men, principally Republicans, as also expanded to the intention of making a men, principally Republicans, as also expanded to the intention of making a men, principally Republicans, as also expanded to the intention of making a men, principally Republicans, as also expanded to the intention of making a men, principally Republicans, as also expanded to the intention of making a men, principally Republicans, as also expanded to the intention of making a men, principally Republicans, as also expanded to the intention of making a men, principally Republicans, as also expanded to the intention of making a men, principally Republicans, as also expanded to the intention of making a men, principally Republicans, as also expanded to the intention of making a men, principally Republicans, as also expanded to the intention of making a men, principally Republicans, as also expanded to the intention of making a men, principally Republicans, as also expanded to the intention of making a men, principally Republicans, and the intention of making a men, principally Republicans, and the intention of making a men, principally Republicans, and the men fought battle at first but we have gained the victory. In a recent report from fed worms make as much silk and as good a quality as the mulberry fed ones; but objections is made to the thorns of We consider the spines or perance and meant much trouble for the is quite conservative, but it will furnish thorns a benefit rather than a disadvanworms from a flat surface and give a just rendered a decision that an employe hold that prohibition is a failure as a herry tree they feed on a flat surface; stripped from the branches of the multhe little ones and the larger ones are not to become stifled under the leaves; besides it is natural for the worms to climb very dexterous in their movements winding around and avoiding the thorns; the seek for a place to make the cocoon, they sometimes fall and then are pierced by the spines. The new spaper reporters of Guthrie are getting so hardened that they no longer leave their meals to see a shooting scrape around the carner.

The new spaper is a desire of the same many of the series of the second and a strip of the same around The Guthrie Democrat says it is an absolute fact that one half of the valuable property in the central part of Guthrie property owned by men who never lived in the strip having three times as much eccentrally of character and appearance proper is councilly men who never lived in Norman will have "design" on April 22.

Norman will have "design" on April 22.

April the 22d and July the 4th once part of the territory. Then have longer on the design of the description of the stands as good a in its head.

OREAM'S

MOST PERFECT MADE. NEW YORK'S GREAT CHEMIST

This is to certify that I have analyzed Dr. Price's Gream Baking Powder,

1 find it composed of pure materials, compounded on a creet set as
iffe principles. The ingredients are socurately and sciently
fically conceptioned. Hence, bened or blackits prepar
et with it are believe numbed for dispession
